ALABARE BASED WELFARE OFFICER

The welfare officers will be operating alongside the Alabare team at eth 3 above locations the team consists of

- consisting of social mobility coach,
- Boots on the Ground activity staff.

The Welfare Officer will receive referrals from the above Alabare team. The ex Services personnel who will require the DMWS service are those with complex health conditions and who are finding it difficult to engage with the Alabare program of support.

This post calls for close collaboration and partnership working with Alabare staff and the DMWS service delivery should be seamless to the ex-service person we support.

HOSPITAL BASED WELFARE OFFICER:

Hospital based welfare officers will be operating within the NHS hospitals at their designated hospital location supporting service personnel and veterans through their medical pathways and out in the community. Referrals will be received from numerous health and social care staff who will be dealing with veterans and service personnel at different stages of their medical pathway by assessing wellbeing needs such as finances, housing, social isolation etc. WOs will make intelligent supported referrals to partner organisations to create an extended support network tailored specifically for that individual.

The welfare officer will be expected to carry out networking with partners daily making sure that their presence is known by the medical staff. With an NHS focus on delayed discharges, WOs will look to contribute to this ongoing effort. NHS staff have suggested that DMWS staff will work more effectively with the new 'front door' model that will focus on admission avoidance and efficient discharges. This would mean that DMWS staff would operate both out of the discharge hub and within the admission units covering all sides of the discharge process.
